Agent of Change Badge

Digital Photographer

McAlister Photoworks

invites your troop to participate in a fun and informative one hour program about digital photography.

Our goal is to assist the scouts in completing some of the requirements to earn a Digital Photographer Badge.

We'll look at different types of digital photo and video cameras and the kinds of media used to record digital images. Discover the parts of the cameras, see how to work the controls, and record and review your images.

Get tips about cleaning, maintaining and using a camera as well as how to preserve your digital images. Look inside a digital camera and also see what pixels look like.

See lots of creative projects you can make with your photos.

We'll talk about some tips on how to photograph nature close-ups, landscapes, and how to take great pictures of family and friends.

Class Fee: $20 Classes may be scheduled for after school weekdays (Tuesdays, Wednesdays, Thursdays) in January thru March

(Class location & time arrangements will be made according to your regular troop meeting site)

If you are interested in arranging a class for your group or have questions, please call Nancy Staley at 890-8642
